COMMISSION DEMANDS RELIEF HEALTH LEGISLATION IS CALLED FOR

Hawaiian BRISTOW BILL IS Harbors ONLY SLIGHT CUT Assured

(Special Bulletin Cable)
WASHINGTON, D. C., Apr. 4.—The House Indian government commission today told the Senate finance committee that the free sugar bill would work irreparable harm on Porto Rico.

Alexander & Baldwin today received pounds. Returns present Cuban allowances the following cablegram giving full details on the substitute sugar bill introduced to the Senate yesterday by Senator Bristow of Kansas:

"Bristow's substitute eliminates the Dutch standard, Preferential, full duty. Ninety-six-degree test sugar \$1.42½ per 100 pounds until June 30, 1918, \$1.32 per 100 pounds after that. \$1.20½ per 100

"Marked quiet, with no pressure to self."

This news is regarded as about the most cheering for months. The proposed reduction is really very slight, so slight, in fact, that at Alexander & Baldwin's it is freely predicted that the House and Senate will deadlock on sugar tariff revision, and nothing will be done.

Hawaii gets the full amount asked for in the estimates for harbor improvement work, in the bill just reported out of committee by the House committee on rivers and harbors.

The items affecting the Territory in this bill, which was reported March 7 and ordered printed, are as follows:

Improving Harbor at Hilo, Hawaii

Completing improvement by dredging in accordance with the report submitted by House Document No. 415, 62nd Congress, second session, \$76,000.

Improving Kauai Harbor, Hawaii

Completing improvement, \$10,000.

"These are the sums that were asked for in the estimates," said Major Weston, district engineer officer, this morning. "The seventy-six thousand at Hilo is for dredging purposes alone, as we will not be ready for further expenditure on the breakwater this year. The hundred thousand for Kauai is also for dredging, and should complete the entire job. This is the work that is to be started in a few weeks by the Hawaiian Dredging Co."

Lieutenant Colonel Rees, chief engineer of the Western Division, who has been in Hawaii for the past month on a tour of inspection, returns to the Coast on the Sherman tomorrow. He has visited Hawaii, Maui and Kauai, and has familiarized himself with all engineering work in progress and projected that the army is doing here.

"I found everything in first-class shape," said Colonel Rees to a Bulletin reporter this morning. "The work that is being done in the Territory is exceptionally interesting just now. It is similar to the class of work that the engineers are doing in other parts of the country, of course, but there are some unusual conditions here. Aside from business, though, my stay here has been most pleasant. This is my first trip to the Islands, and I have enjoyed it immensely."

LOCAL MEN HEAR BOLLES IS DEAD

Many local shipping men feel a sense of personal loss in the news of the death of Capt. O. F. Bolles, for seventeen years government inspector of bulls at San Francisco. He died a few days ago at his home on the Coast.

Capt. William Howe and Mr. Thomas Heene, local inspectors of bulls and hounds, knew the late official, and Capt. Howe was in the same office with him for three years. He was nearly 72 years old, and was a native of Wachusetts, Mass.

Captain James Guthrie, who was assistant inspector for eleven years, has received his appointment from the Secretary of Commerce and Labor to succeed Captain Bolles, who resigned two weeks ago.

The new inspector is well known on the Coast. For fifteen years before entering the Government service he was skipper of various vessels of the Pacific Coast Steamship Company's fleet.

Guthrie will assume his new duties at once.

Two fifth of the world's 100,000,000 swine are in the United States.

The English postal authorities have adopted a novel method of selling stamps, a strip of sixty being rolled within a small metal box, for which no additional charge is made.

The Metropolitan Meat Market will close at noon tomorrow. One delivery.

POLICE USED AS POLITICAL PAWNS

The Democratic Territorial central committee will hold a special meeting at 7:30 this evening in its quarters in the Waverly building, to consider several important matters connected with the primary election next Saturday.

Two protests of the McCarthy faction will be considered, the first against closing nominations in the eleventh precinct of the Fifth District before the McCarthy list was in, and the other against refusing the enrollment of a number of Democrats in several of the precinct clubs on the ground that their application cards were not in regular form. The matter of deciding if convention hall will also come up tonight.

That Sheriff Jarrett has been doing politics with some of the force without their knowledge, in nominating them for convention delegates, is the contention of some of his own policemen. Some of the policemen when seen this morning at the police station stated that they did not know how their names got on the Democratic list when, as a matter of fact, they continued, they were busy at their work.

"I don't know how they got my name in the paper," said Assistant Hack Inspector Tripp this morning. "I never attended the political meetings, but the fact that my name is on the list now would certainly encourage me to dive right into the political ring and work for the success of my candidate for sheriff."

Documents put M'DUFFIE ON
IN ARE MANY BURGLARS' TRAIL

The direct examination of Albert Horner was concluded before Judge Robinson in the circuit court this morning and cross-examination started in connection with the case in which he is trying to prevent his brother, Robert Horner, from selling stock of the Kokua plantation.

A mass of documentary evidence was produced, and at recess all the testimony of the witness had been given. Albert Horner yesterday told of his offer to Robert of \$100 a share for all that his brother held. This was turned down, however, Robert stating that

Albert had a check to make such an offer and that he would not take it as he wanted to get the shares for his brother.
